

The New Public Coin (TNPC)

The Global Decentralize Network of Future Financial Era

1 July - 28 July 2018

What are the problems TNPC solves?

Real Problems

- Manual methods of communication are prone to generating inefficiency and error as they cannot be accurately tracked at all times.
- The traceability of a parcel's information is lacking, leading to redundant tasks such as re-weighing and re-labeling.

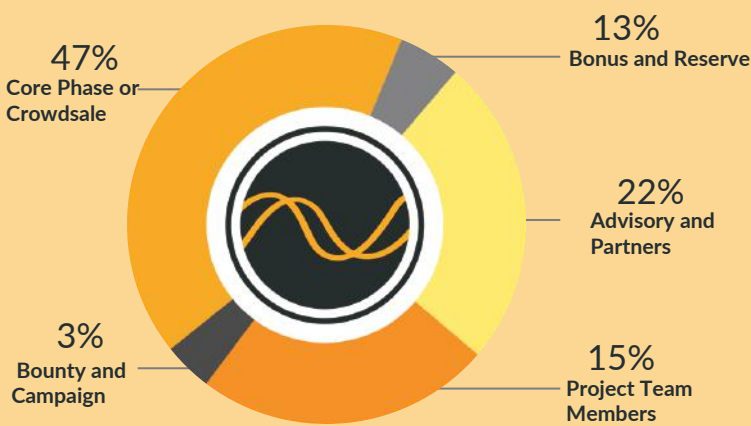

Our Solutions

- We will make the communication and record keeping an automated method to keep the things simpler.
- We will use modern technical methods to keep track of the parcels, labeling, and other such stuff.
- Failed deliveries and lost shipments will be taken care of through advance technologies to reduce errors.

Roadmap

Token Sale and Distribution

Total Token Supply	: 70000000 TNPC
